

3D CIC + QIF Summit **REGISTER NOW**

October 2-6, 2017 >> Golden Colorado

Why QIF Matters, A Lot More Than You Think

Posted on August 25, 2017 by Michelle Nordwald

Evan Yares of The Yares Organization will present at the 2017 **Quality Information Framework (QIF) Symposium**. The 3D Collaboration & Interoperability Congress (3D CIC) and the QIF Symposium will be held in Golden, Colorado on October 3-5, 2017.

PRESENTATION**Why QIF Matters, A Lot More Than You Think**

QIF was created in response to a pressing need for metrology interoperability. Yet, it is far more than a metrology standard. It is one of the first open standards to provide substantial support for Model-Based Enterprise, Digital Thread, and Digital Twin concepts, and opens the door to enterprise-wide reuse of CAD data.

**PRESENTER****Evan Yares**

Principal Consultant
The Yares Organization

Since the early 1980s, **Evan Yares** has built a career focused helping engineers get the tools they need to do their jobs better and and faster. A co-founder of **Cyon Research** and co-creator of **COFES**, the Congress on the Future of Engineering Software, Yares is known for his insightful perspective on engineering software.

3D CIC + QIF SYMPOSIUM

The **3D Collaboration & Interoperability Congress** featuring the Quality Information Symposium focuses on 3D CAD collaboration and interoperability for the entire product lifecycle. With the 2017 theme of **UNITE: Engineering & Shop Floor Collaboration**, real users share their experiences with turning design concepts into manufacturing product reality using 3D models. The joint 3D CIC and QIF Symposium event will be held **October 3-5, 2017** at the **American Mountaineering Center** in Golden, Colorado. Find out more and register for 3D CIC + QIF Symposium at 3dcic.com.
